

Fertilizer Broadcaster

Shaktiman Fertilizer Broadcaster is a modern technology implement designed to spread fertilizers with greater ease and efficiency. While the traditional method of spreading fertilizers with hands was more laborious, time consuming and health hazardous, this modern method designed by us is less time consuming and more comfortable and also it does not present any threat to health. It can spread fertilizers in large portions of land in real time. Various models of this fertilizer broadcaster are available; S-160, S-180, S-250; depending upon hopper size. They can spread the fertilizer fall on 12 to 14 meter width in field. Their unique distributing system ensures uniform spreading of fertilizers over greater distances. The gear box absorbs sudden changes in power and keeps the machine safe. The opening system with independent levers allows the operator to choose to spread the fertilizer only where it is required.

Advantages...

- It allows the operator to spread fertilizers in larger land portion in lesser time.
- It promises uniform spreading of fertilizers which improves organic structure of the land.
- It allows the operator to control the distribution of fertilizers.
- Faster operation saves time and power consumption.
- Its 17 teeth gears stabilize the impact of sudden power change and safeguard the machine.

Fertilizer Broadcaster - Technical Specifications

Model	S-500		
Capacity	Kg / lbs	345 / 759	
Loading Height	inch/mm	44.5/1130	
Weight	Kg/lbs	63/139	
Spreading Width	Granular	inch	468-552
		mm	12000-14000
	Crystalline	inch	240-276
		mm	6000-7000
PTO	1" 3/8		
Transmission	1:1		
Absorbed Power at 540 RPM	6HP / 4.5 Kw
